

CHRISTOPHER J. NEVILLE

Senior Hydrogeologist

AREAS OF EXPERTISE

- Quantitative Interpretation of Hydrogeologic Data
- Groundwater Flow Modeling
- Solute Transport Modeling
- Peer Review
- Litigation Support and Expert Testimony
- Professional Instruction

SUMMARY OF QUALIFICATIONS

Mr. Neville directs the Canadian operations of S.S. Papadopoulos & Associates, Inc. from its Waterloo, Ontario office. His primary area of expertise is the quantitative analysis of groundwater flow and solute transport. He synthesizes hydrogeologic data, evaluates groundwater resources, develops regional and site-scale analyses of groundwater flow and solute transport, and evaluates remedial measures.

Mr. Neville has developed and documented large-scale three-dimensional numerical models for industrial, mining, and government clients, and has reviewed numerous site-specific hydrogeologic analyses and groundwater modeling codes. He has extensive experience in the development of work plans for groundwater projects and in directing groundwater modeling studies. He serves as a senior peer-reviewer and provides technical support for litigation. Mr. Neville is actively involved in the development of professional short courses in the interpretation of pumping tests and groundwater modeling, and he assists in teaching graduate courses at the University of Waterloo.

REPRESENTATIVE EXPERIENCE

S.S. Papadopoulos & Associates, Inc., Waterloo, Ontario, Canada

INTERPRETATION OF HYDROGEOLOGIC AND GEOCHEMICAL DATA

- **Hanford Nuclear Reservation, Washington** — Directed and reviewed the interpretation of well development data and slug testing (100-Area). Interpreted step test and constant-rate pumping test data. Directed, reviewed and documented the interpretation of RUM aquifer tests. Directed the interpretation of Cr (VI) column data and the development of nonequilibrium transport models to predict the progress of remediation.
- **Onondaga, New York** — Developed a solute-transport analysis to estimate Darcy flux through lakebed sediments from concentration profiles.
- **Region of Waterloo, Middleton Street Well Field** — Interpreted hydraulic testing data for a municipal well field in fractured-karstic rock.
- **Schlage Lock Company**, Colorado Springs, Colorado — Modified and applied an axisymmetric finite-difference model for the interpretation of aquifer pumping tests.
- **Chem-Dyne Site**, Hamilton, Ohio — Developed and applied models for the interpretation of stepped-rate aquifer tests.
- **Texas-Eastern Gas Transmission Company**, Houston, Texas — Prepared a closure plan for a

YEARS OF EXPERIENCE: 25+

EDUCATION

MSc – Earth Sciences (Hydrogeology),
University of Waterloo, 1992

MEng – Course work for Geotechnical
Engineering, University of Alberta,
1985–1987

BEng – Civil Engineering, McGill
University, 1985

pump-and-treat remediation system of a BTEX plume in fractured porous-media.

GROUNDWATER FLOW MODELING FOR WATER RESOURCES DEVELOPMENT AND PROTECTION

- **Region of Waterloo, Ontario** — Directed the development of a groundwater model to support an application for additional water takings in the Cambridge East area.
- **Itapúa, Paraguay** — Directed the development of a regional groundwater flow model of the Guaraní transboundary aquifer for the region adjacent to the Paraná River in eastern Paraguay.
- **Prey Veng and Svay Rieng Provinces, Cambodia** — Directed the development of a regional groundwater flow model of southeastern Cambodia for the evaluation of the feasibility of the development of large-scale groundwater withdrawals for irrigation.
- **Town of Colgan, Ontario** — Developed a regional groundwater flow model to delineate a wellhead protection area for a proposed new municipal supply well.
- **Region of Waterloo, Middleton Street Well Field** — Directed the development of groundwater modeling analyses to support the delineation of capture zones and the estimation of the sustainable yield of the well field.
- **Region of Waterloo, Greenbrook Well Field** — Developed analyses to predict water-level recoveries following the shutdown of the well field.
- **Region of Waterloo, Cedar Creek Groundwater Study** — Directed the development of a groundwater model to evaluate groundwater resources and to anticipate the potential effects of large-scale gravel extraction.
- **Region of Waterloo, Mannheim Well Field** — Directed the delineation of capture zones for municipal supply wells.
- **Town of Marathon, Ontario** — Directed the development of a groundwater model to delineate wellhead protection areas for municipal wells.

GROUNDWATER FLOW AND SOLUTE TRANSPORT MODELING TO SUPPORT THE DESIGN AND EVALUATION OF REMEDIAL MEASURES AT CONTAMINATED SITES

- **Glenn Springs Holdings, Inc. (Occidental Chemical Corporation), Hyde Park Landfill, Niagara Falls, New York** — Directed the development of a large-scale groundwater model to evaluate capture of contaminated groundwater and to optimize remedial actions. Assignments included the development of work plans for data collection and interpretation, the supervision of hydraulic testing and analysis, and supervision of groundwater modeling.
- **Gurabo, Puerto Rico** — Directed numerical flow- and solute-transport modeling conducted to evaluate the performance of a pump-and-treat system.
- **Massachusetts Military Reservation, Cape Cod** — Developed an analysis to predict the extent of groundwater mounding due to the re-injection of treated groundwater.
- **Schlage Lock Company, Colorado Springs, Colorado** — Developed a groundwater model to assist in the evaluation of alternative pump-and-treat designs for remediation of a PCE plume.
- **Pacific Gas & Electric Company, California** — Developed and documented a groundwater flow and transport model for simulating the evolution of a plume of chromium-contaminated groundwater. Developed and documented analyses for the evaluation of remedial pumping alternatives.
- **Oregon Department of Environmental Quality, Portland** — Developed and applied a method of analysis for optimizing the placement of recovery wells for remediation of a large plume of TCE-contaminated groundwater and for protection of the City of Portland's emergency water supply.

CHRISTOPHER J. NEVILLE

Senior Hydrogeologist

Page 3

- **Eastman Kodak Company**, Rochester, New York — Assisted in the development of a regional groundwater model that had automatic telescopic mesh refinement capabilities. Developed a user manual for the model, and provided a training course to enable Kodak staff to evaluate proposed remedial measures at the facility. Directed the updating of the model.
- **Pyrite Canyon Group**, California — Developed numerical air-flow and groundwater-flow models to assist in the evaluation of remedial measures at the Stringfellow Acid Pits. Conducted analyses for feasibility studies of remediation of shallow organic contamination, using dewatering and soil vapor extraction. Developed analyses for evaluating the performance data from a horizontal well constructed in fractured bedrock and for predicting the long-term efficacy of the well for plume remediation.

SENIOR PEER REVIEW

- **Hanson Brick Co.**, Oakville, Ontario, Canada — Provided senior peer review for the Region of Halton for the assessment of a proposed shale quarry.
- **Nelson Quarry**, Burlington, Ontario, Canada — Provided senior peer review for the Region of Halton for the assessment of a proposed expansion of a dolostone quarry.
- **Ontario Ministry of the Environment** — Served on the peer review panel for the development of guidance documents for Source Water Protection.
- **Credit Valley**, Toronto and Region, and **Central Lake Ontario Conservation Authority (CTC) Source Water Protection Region**, Canada — Served as senior peer review for the development of water budget studies and water quantity risk assessment.
- **Lake Erie Source Water Protection Region**, Canada — Served on a peer review panel for the development of water budget studies and water quantity risk assessment for the Long Point, Kettle Creek, and Catfish Creek Conservation Authorities.
- **York-Peel-Durham-Toronto (YPDT) Oak Ridge Moraine Groundwater Model**, Ontario, Canada — Provided senior peer review for the development and application of a large-scale regional groundwater flow model of the Oak Ridge Moraine area.
- **Waste Management Canada Richmond Landfill**, Ontario — Provided senior peer review for the analysis of the impacts of landfill expansion.
- **Arkell Spring Grounds**, City of Guelph, Ontario, Canada — Provided senior peer review in the analysis of impacts of increased water takings.
- **Vancouver Wharves Berth 1 Site**, Canada — Provided senior peer review for the modeling of measures to remediate groundwater contaminated with heavy metals.
- **CH2M HILL-Canada, Alder Creek Groundwater Study**, Region of Waterloo — Provided senior peer review in the development of the Alder Creek regional groundwater flow model.
- **Region of Waterloo Ontario**, Canada — Reviewed the delineation of capture zones for municipal supply wells in the Waterloo Moraine.
- **Smithville Phase IV**, Ontario, Canada — Reviewed groundwater-flow and solute-transport models for the evaluation of remedial alternatives for the Smithville PCB contamination site.

LITIGATION SUPPORT

- **Pinnacle Heights Golf Course**, Orangeville, Ontario — Provided expert opinion on the reliability of groundwater modeling conducted to evaluate the potential impacts of irrigation pumping for a proposed golf course.
- **Thomson Facility**, Marion, Indiana — Provided expert opinion on the groundwater velocity at the site. The analysis was developed within a stochastic framework.

CHRISTOPHER J. NEVILLE

Senior Hydrogeologist

Page 4

- **Homestead Golf Course**, Michigan — Reviewed the environmental impact of a proposed golf course development adjacent to a sensitive river.
- **Cities of Vaughn and Pickering**, Ontario — Evaluated the design calculations for proposed municipal waste landfills having complex liners. Reviewed the methods for predicting leakage through composite geomembrane liners, and reviewed the methods to predict the development of groundwater mounds due to failure of leachate collection systems. Performed benchmarking of the solute transport code POLLUTE.
- **Duntroon Quarry Expansion**, Singhampton, Ontario — Served as expert witness for the Niagara Escarpment Commission for the assessment of hydrogeologic aspects of the proposed extension of the Duntroon Quarry. Prepared expert witness reports and provided testimony for the Joint Board under the *Consolidated Hearings Act*.
- **Nelson Quarry Expansion**, Burlington, Ontario — Served as expert witness for Halton Region for the assessment of hydrogeologic aspects of the proposed extension of the Nelson Quarry. Prepared expert witness reports and assisted counsel in preparation of cross-examination for the Joint Board under the *Consolidated Hearings Act*.
- **MAQ Highland Quarry**, Singhampton, Ontario — Directed the Experts Meeting and prepared the *Statement of Agreed Facts* for the proposed MAQ Highland Quarry.

HYDROGEOLOGY TRAINING

- **Critical Thinking in Aquifer Test Interpretation** — Developer and instructor of a professional short course on hydrogeologic testing. The course has now been taught over 35 times in Canada, the United States, Brazil and China.
- **International Ground-Water Modeling Center, Colorado School of Mines**, Golden, Colorado — Provided professional short courses in MT3D solute transport modeling.
- **Environment Institute for Continuing Education** — Developed and presented Internet-based seminars.
- **Midwest Geosciences** — Presented short-course lectures. Developed and presented Internet-based seminars on the interpretation of aquifer tests.
- **Kingdom of Cambodia Ministry of Water Resources and Meteorology** — Provided training for groundwater modeling expertise in Cambodia.
- **Eastman Kodak Company**, Region of Waterloo — Developed and led training courses for site-specific models and technology transfer.
